

## Donut Cone Packing

The Donut Cone packing is an ideal choice when a cone packing profile is preferred. This design excels in scenarios where limited lubrication from gas locking or pump-off occurs frequently. Featuring a unique press-fit lubrication ring, the Donut Cone ensures effective cooling and lubrication of the polish rod at any stroke speed. Operators can expect a reliable seal for lighter fluids and confident handling of heavier produced products.

CPP manufactures Donut Cone packing using economical, sour service, and thermal service materials, ensuring versatility for various applications. Contact CPP today to learn more about our cone packing troubleshooting and optimization program.

### General Service (NBR)

<b>Temp</b>	125°C (94°F)
<b>Max Pressure</b>	2,500 PSI
<b>H2S</b>	5%
<b>CO2</b>	2%
<b>Abrasive Resistance</b>	Moderate

### Specialty Service (HNBR)

<b>PH Range</b>	2-13
<b>Temp</b>	165°C (329°F)
<b>Max Pressure</b>	Moderate
<b>H2S</b>	10%
<b>CO2</b>	20%
<b>Abrasive Resistance</b>	Moderate
