At CPP, we know the value of reliable, long-lasting equipment in the oil and gas industry. That's why we're proud to offer our 150 Series BOP Rams, designed to handle all polish rod sizes and production conditions with ease.

Built for durability, our rams withstand high-pressure sour production, high temperatures, and low-pressure sweet production, ensuring safe, efficient operations. With a working pressure of up to 1,500 PSI and a range of economical compounds, they provide a secure environment for packing changes, boosting your team's productivity.

Our experts are here to recommend the best compound and packing combinations for your needs.

Trust CPP for high-quality, dependable BOP rams.
