

## RNE - "H" CLEVIS

Introducing the "H" Clevis, design allows the rod elevator to hang true without the hassle of dealing with angled rod elevators. Unlike the cumbersome 30T & 150T McKissick C clevis, our "H" Clevis is designed for ease of use, eliminating the struggles of opening and closing massive clevises.

### KEY BENEFITS:

- **Certified and Traceable:** Our "H" Clevis is engineered and approved for overhead use, with every item NDT inspected and SIR# tracked for a 6-year certification. Unlike the competition, our product certification ensures safety and reliability.
- **Unmatched Value:** Get the assurance of certified and traceable quality at the same price as uncertified products from job shop machine shops.
- **Weight Rating:** Rated at 30 Tones - Fits the McKissick Block 80T, 100T and 150T
- **Extreme Temperature Rating:** Rated for temperatures as low as -40°F (-40°C), outperforming the competition.
- **Industry Approval:** Trusted by industry giants, Exxon and Shell, for their critical operations.

Upgrade to the "H" Clevis and experience the difference in safety, convenience, and performance!
