

## PIPE WIPERS

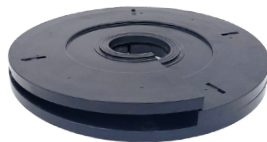

CPP Distribution carries a wide selection of oilfield pipe wipers in various sizes and styles, ready for today's demanding field conditions.

Our drill pipe wipers are among our top-selling consumables. Made from a proprietary tear-resistant rubber, they stay flexible even in cold temperatures and work with both water- and oil-based drilling muds. Available in Dual Split and Single Solid types, all wipers feature a heavy-duty spring steel ring to prevent collapse and reduce the risk of pieces falling down-hole.

Designed for use on service rigs, drilling rigs, and HDD rigs, pipe wipers clean mud, cuttings, and fluids from pipe and tubing. This helps maintain a safer, cleaner rig floor and improves handling.

## RNE Bridge Gate Gaskets

RNE Bridge Gate Gaskets are specialized components designed to create a tight, dependable seal between two mating surfaces. Commonly used in bridge structures and a variety of industrial applications, these gaskets help prevent leaks of water, air, or other substances, even under challenging conditions.

**Available Sizes:**  
6" • 8" • 10" • 12"
