

# Improving drilling operations performance

### Quick and easy to apply

- *within seconds*
- *with one hand only*
- *no tools required*
- *easy under extreme weather conditions*
- *easy for inspection and tests*

### All-round and reliable

- *fits all*
- *for doped and dope-less connections*
- *secure locking mechanism*

### Cost-efficient and sustainable

- *time-saving*
- *ergonomically designed*
- *long lifetime*
- *reduction in storage costs*
- *100% recyclable*
- *reduced use of dope*

Patented

## PipeProteq® Hybrid

### Protect the connection from mill to yard to rig

PipeProteq® Hybrid is a box & pin protector for casing and tubing. It is designed to optimize the drilling operations with one push-and-lock thread protector used during manufacturing, transportation, storage and running operations.
