

ROD TRANSFERS

Built for Safety. Engineered for Performance.

Experience the most trusted rod transfer solution—crafted entirely from high-grade steel for unmatched durability and smooth operation. With premium bearings, a wide range of sizes including specialty and long-neck options for PC pump applications, and easy color-coded identification, this system is designed for real-world demands. Now rated for 700 lbs capacity, it's the only rod transfer fully certified, serial-numbered, and inspected for safe overhead use—no exceptions.

Key Advantages:

- **Complete Steel Construction:** No cast components for superior strength.
- **Certified for Overhead Use:** The only engineered and serial-numbered rod transfer in the industry.
- **Versatile Sizing:** Standard and specialty sizes from 5/8" to 1", plus long-neck options.
- **Color-Coded Identification:** Quick and easy selection in the field.
- **Increased Capacity:** Handles up to 700 lbs for today's demanding operations.
