

Max Cup Pigs

The Maxi Cup Pig features a solid-cast polyurethane construction with an aerodynamic nose profile that allows for smooth navigation through short-radius bends and tee sections. Engineered for durability and performance, Maxi Cup Pigs provide effective sealing and cleaning while accommodating varying pipeline wall thicknesses.

Depending on polyurethane hardness (durometer), these pigs can be used in pipelines ranging from Schedule 40 through Schedule 80 wall thicknesses.

Available Configurations

- 2-Cup Design
- 3-Cup Design
- Custom lengths available
- Any standard pig design can be configured as a 2-Cup Maxi Cup for specific applications

Applications

- Pipeline Cleaning
- Dewatering
- Product Separation
- Line Filling & Displacement
- Routine Pipeline Maintenance
- Commissioning Operations

Size	Length		Cup O.D.	Back Cup O.D.
	2 Cup	3 Cup		
3"	4.34"	6.954"	3.354"	3.40"
